AGENDA OF FIRST MEETING MENTOR/ MENTEE

This may help you to
structure the first meeting

Main aim: clarify framework conditions of the mentorship

1. Get to know each other (possibly along a short walk through the farm of the Mentor)
2. Find consensus about the following points:
 - a. Clarify the main goals of the mentorship:
 - i. Exchange of information (in general, about a special topic)
 - ii. To have experienced advice in a certain project (build a stable, change to organic farming...)
 - iii. Talk about the expectations you have;
 - iv. Talk about how the goals will be reached;
 - b. Discuss how you can keep in touch (skype, telephone, e-mail etc.)
 - c. Think about how often you will communicate (weekly, monthly, if necessary...)
 - d. Determine for how long the mentoring relation will exist:
 - i. Until a certain goal (e.g. profit raise of 10%, finished new stable...)
 - ii. For a certain time (one year, six months)
 - e. Additionally:
 - i. Consider the question if there will be one or several personal visits of the mentor on the mentees farm.
 - ii. Talk in an open way about the point, if there will be a financial compensation of the Mentor, and focus on the added value of the relation for both sides.
